**Paintless
DENT REPAIR PLAN**

Dents and dings from things such as runaway shopping carts and wind blown car doors are more than annoying. They reduce your vehicle’s value and overall appearance; and the truth is, most cars have them or are going to get them.

What is Paintless Dent Repair?

Paintless Dent Repair (PDR) is an innovative process developed by automobile manufacturing production teams to remove small dents and dings from painted sheet metal surfaces without harming the vehicles factory finish.

Our Certified PDR Service Technicians are highly skilled craftsmen who utilize specialized hand tools to manipulate and flex the metal back to its original form.

PDR works from behind the vehicle’s damage; therefore, it does not require sanding, painting, or body fillers.

In most cases, there is no evidence a dent ever existed.
